Work Experience

2019 – current	**Aumcore LLC** Role: **Drupal Expert** Working in team in **Agile** environment.	My main responsibilities are: • PHP/SQL developing (Drupal developer and expert) • Technical management of team and code review. I'm currently working on a full portal redesign project for OptumRx inc based on **Drupal** technology. The main purpose of the project is to use **Drupal** as an **Headless CMS** to serve **multi-platform content via Rest API**. The new portal frontend will use ReactJS technology.
2014 – current	**Appnova ltd** Role: **Technical Lead**	My main **responsibilities** are: • **PHP**/SQL developing (**Magento**, **Wordpress**, bespoke solutions), Javascript UI (jQuery, FabricJs, bespoke code) • **VPS configuration and management** • Technical management of team and code review. • Projects developers' effort quotes and candidates selection. I've worked on near all projects related to Magento in Appnova's portfolio and on the largest Wordpress ones. Currently I'm focusing on the Magento ones only. Some **interesting progects** I've worked on: • Simmonds ltd: (**Magento 2**) a catalogue of near 28.000 products continuosly updating via a bespoke API connector I developed that manages product and orders syncronisation with a RMIS platform. • Doctomblinds ltd: (**Magento 2**) an ecommerce based on a complex multilevel table based catalog. • UK-ASEAN Business Council: (**Wordpress**) based on the famous CMS this portal has many improvements to some of the core WP features like a better widget management framework and a custom query system that allows user-centered browsing experience based on past interactions and profile preferences.
2012 - 2014	**Omnia Group** Role: **Senior PHP developer** Working in team with the web and mobile team in **Agile** environment.	My main **responsibilities** in the team were: • PHP/SQL developing (Magento, Symfony applications and Wordpress plugins developing) • Web servers configuration and management • Developing customized SEO tools and automated environment As a web developer I **helped** to: • strengthen web servers security • relate with customers and advise sales area on technology topics Interesting projects I've worked on: • www.treedom.net (Symfony) Main developer. Social network and e-commerce application related to CO2 neutralization
2007 - 2012	**DFLsrl** Role: **Senior Web Developer**	Developer of web applications and community softwares based on PHP, Symfony framework and proprietary solutions or open source derived.
1996 - 2006	**Freelance**	**Graphic and web developer**, **Teacher** (computer science, design and graphic, 3D modeling)
